

ATL RACING FUEL CELLS

Re: COT Fuel Cells

Dear Valued Customer:

For legal liability reasons, ATL has been strongly advised to offer its COT fuel cell #SU-518 as a **complete** package *only*; i.e. bladder, "can", foam, valve and pickup; fully assembled as a **system**.

ATL realizes this change of policy may have created an inconvenience for some Teams, but we live, unfortunately, in a litigious society.

If you are purchasing a "replacement" component, i.e. bladder, valve, container or other fuel cell part, please be certain to re-assemble it with other pieces from the **same** manufacturer. For reasons of safety, warranty and reliability, don't mix ATL, Fuel Safe and Waterman components without the express authority of their makers.

Teams who install and use the ATL **complete** COT fuel cell System shall enjoy continuous factory support together with ATL's full 5-year limited warranty coverage. Those who mismatch components modify ATL's design or **substitute parts** of their own manufacture will annul both ATL's warranty and any implied manufacturer responsibility.

Again, ATL regrets and apologizes if this policy creates a potential hardship or inconvenience, but we appreciate your understanding of the high exposure level within our racing safety equipment industry.

Thank you for your kind cooperation.

Sincerely yours,

Peter J. Regna
