

## News Release:

# ATL "Two-By-Two"™ Rapid-Delivery Fuel Pump System

Wherever fast, effortless fuel transfer is demanded, the ATL "Two-By-Two" Portable Fuel Pump responds.

The "Two-By-Two" Fuel Pump System is a complete portable fuel delivery package for transferring fuel from PETRO-FLEX™ Bladder Tanks (or rigid tanks) to ground vehicles, aircraft, marine craft, or other tanks and drums.

Powered by a 4.2 h.p. rugged diesel engine, the ATL centrifugal pump transfers up to 100 g.p.m. through its two "ports". Hoses, couplers, nozzle, roller cart, filter, ground and idle circuit are all included in the system.

The "Two-By-Two" Fuel Pump System may also be used to fill storage vessels when off-loading tank trucks or tank wagons. All components in the "Two-By-Two" Fuel Pump System are resistant to gasoline (mogas), diesel, JP4, 5, 8, 10, Avgas and 30% oxygenated gasoline.

Options and custom designs are readily available, too!
