

NEWS RELEASE:

ATL AQUA-FLEX® "PILLOW-TANKS" FOR EMERGENCY PREPAREDNESS WATER STORAGE

Aero Tec Laboratories, Inc. (ATL), is a proud supplier of collapsible pillow-style water bladders or "Flex-Tanks" for the U.S. military forces and their Allies.

ATL's "AQUA-FLEX®" LEVEL-3 water storage bladders are available in sizes from 25 gallons to 100,000 gallons. These portable bladder tanks are ideal for storing drinking water from Reverse Osmosis (R.O.) and water purification systems as well as for holding waste water from laundries, kitchens and lavatories at remote defense installations and air bases.

"AQUA-FLEX" pillow bladders exceed MIL-T-53029, DOD ATPD 2265 and NSF-61 standards. Superior puncture strength and tear resistance are provided by a high-tenacity nylon insert fabric. Abrasion resistance is achieved by a double-layer coating of exterior rubber. In addition to their superior weathering ability and compact volume, ATL Military style "AQUA-FLEX" LEVEL-3 bladder tanks are highly transportable and remarkably inexpensive. Complete with their flanges, fittings and handles, ATL "AQUA-FLEX" bladders are in stock and ready for immediate worldwide shipment.
