

NEWS RELEASE: ATL COLLAPSIBLE STORAGE BLADDERS PROVIDE INSTANT FUEL AND WATER STORAGE

Aero Tec Laboratories, Inc. (ATL), leader in polymer composite technology, produces a variety of collapsible fabric storage tanks for the Mining and Petroleum Industries.

ATL's Petro-Flex™ and Aqua-Flex™ "pillow" tanks are widely used as fuel and water storage depots at remote mining and geophysical exploration sites. These "pillow" tanks are lightweight and fully collapsible for easy set-up and transport. ATL offers several types of collapsible storage bladder tanks in sizes ranging from 100 to 100,000 gallons. Constructed of a high-tenacity nylon insert fabric and ultra tough rubberized exterior, ATL "pillow" bladder tanks are highly resistant to abrasion, tears and puncture.

In addition to their superior weathering ability and compactability, ATL's tanks are remarkably inexpensive. Starting at \$649.00 U.S. dollars, ATL tanks are complete and in stock for immediate shipment worldwide.
