

“FLEX · FUEL” RACING CELLS

ATL Fuel Cells proudly announces its all-new “***Flex - Fuel***” racing bladders. These safety cells enjoy a unique capability of accepting the full range of tomorrow’s racing fuels including leaded gas, unleaded with “oxygenates”, high aromatics, diesel, bio-diesel, “E85” and “M85” alcohol/gasoline blends, and even pure ethyl and methyl alcohols. To achieve such universality, ATL has combined its world renowned Sports Cell bladders with a special fuel-tolerant safety foam baffling. In addition, all internal fuel pickups, fittings, filters, surge tanks, O-rings and seals are custom compounded to resist the full spectrum of new and upcoming racing fuels. ***Flex-Fuel*** fuel cells are ideal for Road Racing, Circle Track, Off-Road and even Offshore Power Boats.

Prepare for the future of racing . . . with ATL’s new ***Flex-Fuel*** fuel cell systems!
