

ATL's New "MAX-SPORT" Sports Cell

ATL RACING FUEL CELLS proudly unveils its new **MAX-SPORT** racing fuel cell for fuel-injected competition cars. **MAX-SPORT** is based on the World's most popular safety fuel cell, the ATL SPORTS CELL, but on a low-carb diet.

With its lightweight check valve and slick aluminum container the **MAX-SPORT** starts out 20% lighter than its competition. But the heart of **MAX-SPORT** is its ultra-trick fuel trapping "surge-tank" with 3 aerospace flap-doors and a self-contained 100 psi fuel injection (EFI) pump. **MAX-SPORT** fuel cells are assembled and ready to install with all fittings and electrics in place.

Maximum safety, Minimum weight and Ultimate performance . . .
MAX-SPORT.

For further information about the all-new **MAX-SPORT** Sports Cell, please contact ATL's Craig Mitchell at 1-800-526-5330
