

NEWS RELEASE: ATL Springs Into Action With New Speedi-Berm™ Secondary Containment System

Aero Tec Laboratories, Inc. (ATL) has introduced its new Speedi-Berm™ Secondary Containment System, which utilizes spring-loaded aluminum buttresses to enable quick deployment and firm support of foldable, yet upright and sturdy berm walls. This novel design employs the newest coated-fabric technology, resulting in a unique chemical-resistant reinforced liner.

ATL's Speedi-Berm™ is a one-piece, self-supporting dike, which is fully collapsible and highly portable. It protects soil and groundwater by preventing exposure to contaminated oil, fuels, toxic wastes, radioactive water, and other hazardous liquids. Speed-Berm™ provides cost effective yet safe storage and containment of drums, barrels, tanks, mobile power equipment, and vehicles. . . even full-size tank trucks!

ATL's Speedi-Berm™ Secondary Containment System is available in sizes ranging from 50 gallons to 50,000 gallons, and provides "In Stock" EPA Compliance.
