## **ATL Donates Tsunami Relief Water Bladders**

Aero Tec Laboratories Inc. (ATL) of Ramsey, New Jersey has teamed with AMERICARES, ADRA International, WORLD CONCERN, HEART TO HEART International, CARE, and SAVE THE CHILDREN in an effort to provide clean drinking water at many TSUNAMI disaster sites.

These dedicated humanitarian organizations are providing water purification equipment and expertise, while ATL has donated its renowned "Aqua-Flex™" bulk water storage bladders. Also known as "pillow tanks", ATL's collapsible water containers hold 10,000, 20,000 and 50,000 gallons, yet can be folded and transported in the trunk of a car!

Aqua-Flex™ bladders were flown to several Southeast Asian disaster sites within two days of ATL's offer to contribute. Many of these rugged, portable and sanitary flex-tanks are now in constant service, storing and dispensing clean water to thousands of homeless survivors of the World's worst natural disaster.

ATL is proud to be playing a small, but important, role in this massive relief effort.
